## Education

### Graduate Certificate

Web Development

Conestoga College

Jan 2024 – April 2025

### Bachelor's Degree

Computer Science

Ramdeobaba College

2016 – 2020

## Skills

React

JavaScript

TypeScript

HTML, CSS

PHP

NodeJs

REST APIs

Express

MongoDB

Firebase

MySQL

GraphQL

## Career Objective

I am a passionate programmer, and have gotten my hands dirty with wide variety of front-end and back-end languages and frameworks. It is my goal to use my skillset in a professional environment, gain exposure and work together with a team to create scalable high performance web applications.

## Professional Experience

### Project Management

Dec 2021 – Dec 2023

India

What I have learnt:

- Improved my managing skills by keeping track of the project status and funding on weekly basis.
- Improved my problem-solving skills by handling issues and setbacks or any changes that the clients require within the project.
- Improved my communication skills by scheduling calls with various application teams, stakeholders, and my superiors.

## Projects

### Chat App (Full-Stack)

March 10th 2025

Github Link: [here](#) Try it Out: [here](#)

- A simple text-messaging app with login and friend-request system.
- Used React and TypeScript to handle the UI and MongoDB for the database.
- Utilised NodeJs, Express and GraphQL for backend integration.
- Encrypted every data stored in the database, i.e, user details and text messages.
- Explored various real-time database handling tools like graphql subscriptions. Settled with Pusher.

### Connec2KW (Full-Stack)

March 5th 2025

Github Link: [here](#) Try it Out: [here](#)

- Connect2KW is a volunteer-run project that manages current events in Waterloo Region.
- A new feature was added that allows citizens to get in touch with others in the region with specific experiences and skill-sets to gain professional insight.
- My Contribution: Create a profile creation page.
